DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

Eagle Rock is a lava rock jutting out of the Snake River. The ferry site originally was in arid country.

Eagle Rock, located a short distance below the ferry, still projects out of the river and has not changed much over the years. Irrigated farming has come to the valley adjacent to the ferry, but otherwise the site has not changed too much in appearance since the time the ferry was replaced by Taylor's Bridge at Idaho Falls. Because it was a ferry, the site is in the river.

STATEMENT OF SIGNIFICANCE
 During the gold rush to Bannock and Virginia City, Eagle Rock ferry offered access from the Oregon Trail and from Salt Lake to these major new mines. The resulting Montana road was one of the important routes in the history of the west. In May 1863, Harry Rickard and William Hickman began the construction of a ferry across the Snake River a few miles above the present town of Idaho Falls. They hoped to gain the upper Missouri gold miners' traffic by opening a new and shorter trail to the Montana gold fields, and they also thought that they might receive a portion of the westward emigrant traffic. Hickman was left to complete the ferry while Rickard explored a new route to Soda Springs on the Oregon Trail. He was successful and soon returned with three wagon trains that he had induced to try his new route. Two of the trains were emigrants while the other was freighters. James Stuart, a well-known Montana pioneer, came along as a guide. The group arrived at the ferry on June 18, 1863. The ferry was not yet completed, however, and the initial crossing was delayed until June 20 when over 200 persons crossed on the new ferry.

In the summer of 1864, James Madison Taylor came through building stage stations for Ben Holladay's Overland Stage Line, a branch of which ran from Salt Lake City to Virginia City, Montana. He located a station at the Eagle Rock Ferry, which he purchased from Rickard and Hickman. At this point, Taylor joined with Edgar M. Morgan and William F. Bartlett to form the Oneida Road, Bridge, and Ferry Company. They were granted a bridge and ferry franchise by a legislative act of December 10, 1864.

The next summer, J. Matt Taylor constructed a bridge over the Snake River at Idaho Falls, as authorized by his legislative franchise. The bridge was always known as Eagle Rock Bridge, named after the ferry it had replaced. Toll rates on the bridge were the same as on the ferry.

Although it was soon replaced by Taylor's Bridge, the Eagle Rock Ferry was the key to the early success of emigrant and freight traffic on this route to the Montana gold fields from Soda Springs. It also aided the growth of the town of Eagle Rock which later became Idaho Falls, now Idaho's third largest city and an important nucleus of a large irrigated farming area.

The attached National Register Inventory-Nomination form is being returned to your office for clarification of the information indicated below.

- 1. Name. _____
- 2. Location. _____
- 3. Classification. Category, etc. needs checking
- 4. Owner of Property. _____
- 5. Location of Legal Description. _____
- 6. Representation in Existing Surveys. _____
- 7. Description. _____
- 8. Statement of Significance. A stronger and more detailed statement would be helpful.
- 9. Bibliography. _____
- 10. Geographical Data.
 - a. Longitude and Latitude Coordinates. _____
 - b. Acreage. _____
- 11. Form Prepared By. _____
- 12. Certification. _____
- Photographic Coverage. _____
- Map Coverage. _____

Other. It is important that all sections of the form be filled out in order to meet our uniform data requirements.

Clarification or correction of the above items must be made prior to the initiation of our professional review. Correction of these technical errors does not necessarily insure that the nomination will then satisfy National Register criteria in full.

Thank you for your attention to the above items checked.
