Dear Property Owner or Tenant,

Re: Water Line Improvements

The City of Idaho Falls is planning on starting phase 2 of the project to replace the water lines in the South Bel-Aire Addition. Homes with existing service lines that already connect to the water main in the street will only require their service lines to be reconnected to the new water main. In the remaining areas the new water main will be relocated from the rear yards and installed in the street and the existing water main that lies behind the houses will be abandoned. In order to reconnect the service line to each house the contractor will bore a line into the backyards (ground conditions permitting) and make the connection there. If problems arise in connecting to the existing backyard service line, they will be handled on a case by case basis with the property owner.

This second phase of the City funded project is scheduled to start in the spring of 2015 and will involve the area between Irving Street and Garfield Street. Parking and access will be impacted during the time the contractor is placing the new water main in the roadway. This will be a great opportunity to sign the Right of Entry forms that all property owners will need to sign before the water can be reconnected to the residence.

THERE WILL BE AN OPEN HOUSE JANUARY 14, 2015 From 5:00 to 7:00 PM
LOCATION: DORA ERICKSON ELEMENTARY

If you have questions please contact the City of Idaho Falls Engineering Office @ 612-8250.
