Life Safety Contractor,

The City of Idaho Falls Ordinance 7-10-3 (C)-(E) requires a Life Safety License (LSL) to be issued by the Fire Code Official with the intent to ensure that the licensee is qualified to design, install, modify, service, or maintain any automatic fire extinguishing system, portable fire extinguisher, fire alarm and detection system, or related equipment. Only one LSL is required per business, all employees are covered under that license.

A LSL and Fire Code Construction Permit is required for the installation of or modification to an automatic fire extinguishing system, fire alarm or detection system, commercial cooking, fire pump, or related equipment. However, routine maintenance performed in accordance with fire code is not considered a modification and does not require a construction permit.

LSL applicants must submit documentation proving the business has the proper qualifications to perform the above mentioned work. Documentation may be in the form of NICET certificates, manufacturer’s certificates, NFPA certificates, State of Idaho issued licenses for fire sprinkler contractors, or equivalents. Applicants must also provide a certificate of liability insurance.

Life Safety Licenses (LSL) are valid from Jan 1 through Dec 31 of each year or any portion thereof.

Fees:

<u>Life Safety License</u>	\$125.00 per year.
<u>Fire Code Construction Permit</u>	\$ 70.00 + additional plan review fees if applicable.
1. Fire Sprinkler System Plan Review	\$140.00 (plus \$2.25 per head)
2. Fire Alarm System Plan Review	\$ 70.00 (or \$4.00 per device whichever is greater)
3. Commercial Cooking Plan Review	\$ 70.00
4. Fire Pump Plan Review	\$140.00

Please submit your LSL application plus the required documentation mentioned in paragraph three above.

Submit application via email and pay fees over the phone using the contact information below:
