

Traffic Control Plan

Project: Waterline Replacement 2022 2-37-13-2 - WTR-2021-04

Contractor: Knife River Const.

Contact: Sunny Ingelstrom

Signed: Rich Hardy

Date: 4/21/22

Plan goal: Plan shows closing Saturn Ave. between Grandview Dr. And Broadway St. Allowing residents only to enter the work area.

This plan specifically shows the end to end closing of Saturn Ave. The project will not always require this extent of closure.

Smaller, less intrusive detours such as using Crestmont Ave or N Colorado St. will be used when possible.

The Bulk of the work is on Saturn Ave. and we are looking to reduce the amount of thru traffic on this road not only for the construction operation but also to keep traffic volume down on any smaller detours that could be set up.

Notes:

1. Distances are approx. and may be modified in the field to meet existing conditions.
2. The traffic control inside the Road Closed to Thru Traffic signs will be thru the use of Candles, Drums, 2wide Barricades, and Caution tape protecting open excavations and equipment.
3. The Contractor will communicate with residents as to the proper way to access their homes.
4. The Contractor will before leaving drive the project and assure all open excavations and equipment is protected.
