Sandy Downs Park

Master Plan Concept
Idaho Falls, Idaho

Revised August 28, 2007

Design Philosophy & Implementation
The selection of the Sandy Downs Park Master Plan programmatic elements took into consideration a broad cross section of feedback from the Idaho Falls local community including surveys, public hearings, the Idaho Falls Community Needs Assessment, and responses from the Town Council as well as the Parks and Recreation Department. It is the intent of the Master Plan to incorporate as many of the community needs as possible while providing flexibility for Sandy Downs to grow and change as the community and funding dictate. Implementation of the Master Plan is anticipated to take place in phases, beginning with the infrastructure and passive recreation amenities. Upon its completion, much of the park will remain open space for passive recreation.
