

NOTICE:

To all City of Idaho Falls building contractors:

The site erosion control required by the Environmental Protection Agency (EPA) mandates that jurisdictions require the submission of Storm Water Pollution Prevention Plans (SWPPP) for construction sites which involves any excavation, grading, transportation or movement of top soil or native rock or which creates a significant chance that soil erosion will transport soil from a construction site into the public gutters or sewer system.

In compliance with the EPA mandate, the City of Idaho Falls has adopted a Construction Site Erosion Control Ordinance #2915 (copies available on request) which will require any site construction or grade change be conducted under the direction of a City of Idaho Falls Certified Erosion Control Contractor.

As of December 1, 2013 in order to secure new building permits for commercial and residential projects on sites in the City of Idaho Falls over 5,000 square feet that require site excavation, you must obtain your Erosion Control Contractor certification.

To obtain your certification please see the attached Erosion Control Certification Process which will provide step by step instruction for completing the online training required for your certification.

Once you have successfully completed this process, contact the City of Idaho Falls Building Department to receive your certification.

NOTE: To avoid any problems with the online training and /or delays in obtaining building permits do not wait to the last minute to register.

Contact Information:

City of Idaho Falls, Building Department, 680 Park Ave. Idaho Falls, Idaho 83402

City of Idaho Falls, Building Dept., P.O. Box 50220, Idaho Falls, Idaho 83405-0220

Erosion Control Contractor Certificate Training Verification Form

Training and certification

Any person who successfully completes a City of Idaho Falls approved erosion & sediment control training program for construction and submits an acceptable application and pays applicable fees shall be recognized a Certified Erosion Control Contractor.

Fees for the issuance of such certification shall be submitted with the Erosion Control Contractor Certificate Application. City certification shall be issued on a calendar year basis and shall be valid until December 31 of the third year of issuance. A change of employment has no effect on the validity of such certification.

Training received from other cities, states or associations may be accepted upon approval of the City of Idaho Falls Public Works Division. Provided that the training is deemed acceptable by the City, the applicant shall complete an application and pay any applicable fees before being recognized as a certified erosion control contractor in Idaho Falls. (Ordinance 2886, 11-10-20110)

Erosion Control Contractor Certificate Process
